OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to **Weather Advisory No. 15 issued at 5:00 AM today** for the heavy rainfall outlook due to TC INDAY and the Southwest Monsoon.

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Minor to moderate impacts** from gale-force winds are possible within any of the areas under Wind Signal No. 2.
- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

The enhanced Southwest Monsoon and the periphery of Typhoon INDAY will bring **strong to gale-force gusts** over the following areas (especially in coastal and upland areas exposed to winds):

- **Today and tomorrow (11 July):** Most of the country.
- **Sunday (12 July):** Most of Luzon, most of Visayas, Zamboanga del Norte, Misamis Occidental, Lanao del Norte, Camiguin, and Davao Oriental

Issued at 5:00 AM, 10 July 2026

Valid for broadcast until the next bulletin at 11:00 AM today.

TRACK AND INTENSITY OUTLOOK

- **It must be emphasized that heavy rainfall and severe winds may still be experienced in localities outside the landfall point and the forecast confidence cone. Refer to “Other Hazards affecting Land Areas” for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.**
- INDAY is forecast to generally move northwestward while remaining over the Philippine Sea and may pass closest to Extreme Northern Luzon between tonight and tomorrow (11 July) morning. Afterwards, INDAY will move toward the southern islands of Japan and may make landfall or pass close over the northern coast of Taiwan. It will then exit the PAR by tomorrow morning or afternoon and make landfall over the eastern coast of mainland China by tomorrow evening or Sunday (12 July) early morning.
- INDAY is forecast to remain as a typhoon until it exits the PAR. It will then weaken into a severe tropical storm after moving further inland over mainland China.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 AM today.
