

TROPICAL CYCLONE BULLETIN NR. 16F

Typhoon INDAY (BAVI)

Issued at 5:00 PM, 11 July 2026

"INDAY" IS NOW APPROACHING THE SOUTHEASTERN COAST OF ZHEJIANG, CHINA.

Location of Center (4:00 PM)

The center of Typhoon INDAY was estimated based on all available data at **695 km North of Itbayat, Batanes (27.0°N, 122.7°E) (OUTSIDE PAR).**

Intensity

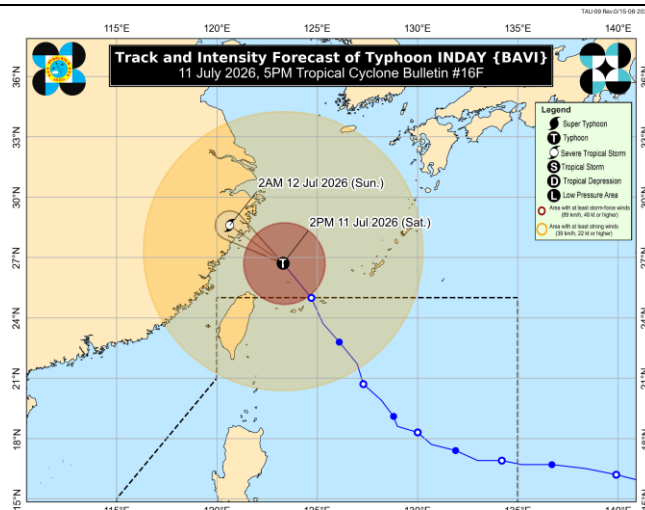

Maximum sustained winds of **140 km/h** near the center, gustiness of up to **170 km/h**, and central pressure of **950 hPa**.

Present Movement

Northwestward at 40 km/h

Extent of Tropical Cyclone Winds

Strong to typhoon-force winds extend outwards up to **820 km** from the center

TRACK AND INTENSITY FORECAST

Date and Time	Center Position			Intensity		Movement dir. and speed (km/h)
	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	
12-Hour Forecast 2:00 AM 12 July 2026	28.6	120.6	880 km North of Extreme Northern Luzon or in the vicinity of Zhejiang, China (OUTSIDE PAR)	110	STS	NW 30

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT

No Wind Signal is currently hoisted

OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to **Weather Advisory No. 21 issued at 5:00 PM today** for the heavy rainfall outlook due to the Southwest Monsoon.

Severe Winds

The enhanced Southwest Monsoon and the periphery of Typhoon INDAY will bring **strong to gale-force gusts** over the following areas (especially in coastal and upland areas exposed to winds):

- **Today:** Most of the country.
- **Tomorrow (12 July):** Most of Luzon, most of Visayas, Zamboanga del Norte, Misamis Occidental, Lanao del Norte, Camiguin, and Davao Oriental.
- **Monday (13 July):** Most of Luzon, Western Visayas, and Negros Occidental.

TROPICAL CYCLONE BULLETIN NR. 16F

Typhoon INDAY (BAVI)

Issued at 5:00 PM, 11 July 2026

AZARDS AFFECTING COASTAL WATERS

A Gale Warning is in effect over the northern seaboard of Northern Luzon. For more details, refer to Gale Warning No. 9 issued at 5:00 PM today.

24-Hour Sea Condition Outlook

Up to very rough seas over the following coastal waters:

- **Up to 5.0 m:** The northern seaboard of Batanes.
- **Up to 4.5 m:** The northern seaboard of Babuyan Islands; the remaining seaboard of Batanes.
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 4.0 m:** The seaboards of Cagayan and Isabela; the northern seaboard of Ilocos Norte; the remaining seaboard of Babuyan Islands.
- **Up to 3.5 m:** The seaboard of northern Aurora; the western seaboard of Lubang Islands; the remaining seaboard of Ilocos Norte.
- **Up to 3.0 m:** The seaboards of Ilocos Sur and Zambales; the northern and eastern seaboards of Catanduanes and Northern Samar; the eastern seaboards of Albay and Sorsogon; the northern seaboard of Eastern Samar; the western seaboards of Pangasinan, Bataan, Occidental Mindoro, Calamian Islands, and northern Palawan.

Up to moderate to rough seas over the following coastal waters:

- **Up to 2.5 m:** The seaboards of La Union, Camarines Norte, Romblon, Cuyo Islands, Antique, and Surigao del Sur; the northern and eastern seaboards of Polillo Islands; the northern seaboard of Camarines Sur; the eastern seaboards of Dinagat Islands, Siargao-Bucas Grande Islands, and Davao Oriental; the western seaboards of Cavite, Batangas, and Negros Occidental; the eastern and southern seaboards of Oriental Mindoro; the southern seaboards of Quezon, Marinduque, Iloilo, and Guimaras; the remaining western seaboard of mainland Palawan; the remaining seaboards of Aurora and Eastern Samar, .
- **Up to 2.0 m:** The remaining seaboards of Luzon; the southern seaboards of Negros Oriental, Davao Oriental, and Davao Occidental; the seaboard of Zamboanga del Norte.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

Other coastal waters have forecast wave heights of less than 2.0 m.

TRACK AND INTENSITY OUTLOOK

- **It must be emphasized that heavy rainfall and severe winds may still be experienced in localities outside the forecast confidence cone. Refer to "Other Hazards affecting Land Areas" for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.**
- INDAY will continue moving generally northwestward over the East China Sea and expected to make landfall over the southeastern coast of Zhejiang, China tonight (11 July) or tomorrow (12 July) early morning.
- INDAY is forecast to maintain its typhoon category while traversing the East China Sea before weakening into a severe tropical storm as it moves further inland over mainland China.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

Unless re-entry occurs, this is the final bulletin for this weather disturbance.
