TROPICAL CYCLONE BULLETIN NR. 1
Severe Tropical Storm FRANCISCO (MEKKHALA)

Issued at 11:00 PM, 20 June 2026

Valid for broadcast until the next bulletin at 5:00 AM tomorrow.

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT

No Wind Signal is currently hoisted

OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

FRANCISCO is less likely to directly affect the weather condition of the country in the next 24 hours.

Severe Winds

Based on the latest forecast track, **the hoisting of Wind Signal No.1 over the northern and eastern portions of Northern Luzon is not ruled out.**

The Southwest Monsoon will bring strong to gale-force gusts over the following areas (especially in coastal and upland areas exposed to winds):

- **Tomorrow (21 June):** Siquijor, Camiguin, and the southern portions of Davao Oriental, Davao Occidental, and Sarangani.
- **Monday (22 June):** Romblon, most of Visayas, Zamboanga del Norte, Misamis Occidental, Lanao del Norte, Camiguin, Surigao del Norte, and Dinagat Islands.

TROPICAL CYCLONE BULLETIN NR. 1
Severe Tropical Storm FRANCISCO (MEKKHALA)

Issued at 11:00 PM, 20 June 2026

Valid for broadcast until the next bulletin at 5:00 AM tomorrow.

HAZARDS AFFECTING COASTAL WATERS

24-Hour Sea Condition Outlook

Up to moderate seas over the following coastal waters:

- **Up to 2.0 m:** The eastern seabords of Dinagat Islands, Siargao-Bucas Grande Islands, Surigao del Sur, and Davao Oriental.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

Other coastal waters have forecast wave heights of less than 2.0 m.

TRACK AND INTENSITY OUTLOOK

- **It must be emphasized that heavy rainfall and severe winds may still be experienced in localities outside the forecast confidence cone. Refer to “Other Hazards affecting Land Areas” for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.**
- Severe Tropical Storm FRANCISCO will remain over the Philippine Sea throughout the forecast period. It is forecast to move west northwestward until Tuesday (23 June), then it will decelerate as it recurves north northeastward for the rest of the forecast period.
- FRANCISO will continue to intensify and may reach typhoon category by tomorrow (21 June). As it moves over the Philippine Sea, it will further intensify until it reaches its peak intensity likely by Monday (22 June). Thereafter, a weakening trend is expected.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 5:00 AM tomorrow.
